

std::false\_type

```
graph BT; A[playrho::IsMatrix<typename>] --> B[std::false_type]
```

The diagram illustrates an inheritance relationship. At the bottom is a gray box representing the base class `playrho::IsMatrix<typename>`. A blue arrow points upwards from this box to a white box at the top representing the derived class `std::false_type`. Both boxes are divided into three horizontal sections. The top section of the white box contains the text `std::false_type`. The middle and bottom sections of both boxes are empty.

playrho::IsMatrix<  
typename >
