

```
integral_constant<  
    std::size_t, N >
```

The diagram illustrates an inheritance relationship. A light gray box at the top contains the code for `integral_constant< std::size_t, N >`. Below it is a blue arrow pointing upwards. At the bottom is a dark gray box containing the code for `std::tuple_size< playrho::ArrayList< T, N, SIZE_TYPE > >`. The arrow indicates that `std::tuple_size` inherits from `integral_constant`.

```
std::tuple_size< playrho  
::ArrayList< T, N, SIZE  
_TYPE > >
```
