

std::true_type

```
graph BT; A["playrho::IsInequalityComparable< T1, T2, std::void_t< decltype(T1{} != T2{})> >"] --> B["std::true_type"]
```

The diagram illustrates an inheritance relationship. A light gray box at the top contains the text 'std::true_type'. Below it, a blue arrow points upwards to the bottom edge of this box. The arrow originates from the top edge of a dark gray box below. This dark gray box contains the text 'playrho::IsInequalityComparable < T1, T2, std::void_t< decltype(T1{} != T2{})> >'. The dark gray box is divided into three horizontal sections by two thin lines, with the text spanning the top section.

playrho::IsInequalityComparable
< T1, T2, std::void_t< decltype
(T1{} != T2{})> >
